S0

The image is a brain scan, likely a PET or SPECT scan, showing a cross-section of a brain. The brain is represented by a blue, somewhat circular shape against a black background. A vertical line and a horizontal line intersect at the center, dividing the image into four quadrants. In the lower-left quadrant, there is a small, bright, multi-colored spot (yellow, orange, and red) indicating a localized area of high activity or a lesion. The rest of the brain area is a uniform blue color.
