Tu

The image displays a celestial body with a complex, multi-lobed structure. The central region is dominated by a bright blue and white area, suggesting a high-contrast feature like a star or a dense planetary core. A distinct yellowish-green spot is visible at the bottom center, possibly indicating a specific point of interest or a different material composition. The overall shape is somewhat irregular, with several smaller, dimmer lobes extending from the main body. A white crosshair is superimposed on the image, with the vertical line passing through the center of the main body and the horizontal line intersecting it near the bottom. The background is a deep black, typical of space imagery.
