

ABA:67814204

Arc

The image displays a brain scan, likely an MRI or PET scan, showing two hemispheres. The brain tissue is represented by a dark blue color. There are several bright spots, primarily in the lower central region, which are colored in a gradient from blue to cyan. A vertical white line divides the image into two equal halves, representing the midline of the brain. A horizontal white line crosses the middle of the image, likely representing the level of the scan. The text 'ABA:67814204' is located in the top left corner, and 'Arc' is in the bottom left corner.
