

ABA:67936203

CA2/CA3

This is a fluorescence microscopy image of a brain section, likely from a rodent, showing the CA2/CA3 regions. The image is divided into four quadrants by a white crosshair. The top-left quadrant is labeled 'ABA:67936203' and the bottom-left quadrant is labeled 'CA2/CA3'. The image displays a blue signal, which is most intense in the central region, particularly in the CA2/CA3 area, and less intense in the surrounding tissue. The signal appears to be localized to specific structures within the brain, possibly the hippocampus.
