

ABA: 68269067

SCN

This is a fluorescence microscopy image of a brain section. The image is divided into four quadrants by a vertical and a horizontal white line. The left half of the image shows a bright blue, irregularly shaped region, likely representing the SCN (Suprachiasmatic Nucleus). The right half of the image shows a solid, uniform blue region, likely representing the ABA (Anterior Basal Amygdala). The text 'ABA: 68269067' is in the top left, and 'SCN' is in the bottom left.
