

ABA:68410273

A posterior

This image is a brain scan, likely a PET or SPECT scan, showing a cross-section of the brain. The image is predominantly blue, indicating low activity. A distinct, localized area of high activity is visible in the lower-left quadrant, colored yellow and orange. This area is situated near the base of the brain, possibly in the posterior horn of the lateral ventricle or the occipital region. The image is overlaid with a white crosshair, with the vertical line passing through the center of the high-activity area. The text 'ABA:68410273' is in the top left, and 'A posterior' is in the bottom left.
