

ABA: 68546266

Hb

The image displays a fluorescence microscopy scan of a plant root cross-section. The signal is represented by blue fluorescence against a black background. The root is roughly circular and divided into four quadrants by a white crosshair. The fluorescence is most intense in the lower-left quadrant, showing several bright spots. Fainter, more diffuse fluorescence is visible in the upper-left quadrant. The right half of the root (right quadrants) shows very little to no fluorescence. The text 'ABA: 68546266' is located in the top-left corner, and 'Hb' is in the bottom-left corner.
