

ABA:68745161

ME

This is a coronal PET scan of a human brain. The image is divided into four quadrants by a vertical and a horizontal white line. The left hemisphere (viewer's left) shows a distinct, bright blue/white focal area of increased radiotracer uptake in the posterior region, likely corresponding to the occipital or parietal lobe. The rest of the brain and the right hemisphere show a more uniform, lower-level blue signal. The text 'ABA:68745161' is in the top left, and 'ME' is in the bottom left.
