

ABA: 69013149

SCN

This image is a fluorescence micrograph of a brain section, likely from a rodent, showing the distribution of ABA (arabinoxylan-binding protein). The image is divided into four quadrants by a vertical and a horizontal white line. The top-left quadrant shows a bright, irregularly shaped region of blue fluorescence, indicating the presence of ABA. The top-right quadrant is dark, suggesting no ABA signal. The bottom-left quadrant shows a faint, diffuse blue fluorescence. The bottom-right quadrant is dark, suggesting no ABA signal. The label 'ABA: 69013149' is in the top-left corner, and 'SCN' is in the bottom-left corner.
