VMH

The image shows a coronal section of a brain. A large, irregularly shaped region in the left hemisphere is highlighted in a solid blue color. This region is roughly circular and occupies the majority of the left half of the brain slice. A small, bright blue spot is visible within this blue region, located towards the anterior and medial side. The right hemisphere of the brain slice is not highlighted. A vertical white line runs down the center of the image, separating the two hemispheres. A horizontal white line runs across the middle of the image, passing through the center of the brain slice. The background is black.
