

ABA: 69015482

Cb lobe

The image displays a brain scan, likely an fMRI or PET scan, with a color scale indicating activity levels. The brain is shown in a coronal or axial cross-section. A prominent area of high activity, represented by yellow and red colors, is located in the left cerebellar lobe. The rest of the brain shows lower activity levels, indicated by blue and green colors. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the area of high activity. The text 'ABA: 69015482' is in the top left, and 'Cb lobe' is in the bottom left.
