A posterior

The image displays a cross-sectional view of a brain, likely from a PET or SPECT scan. The brain tissue is represented by a dark blue color. A prominent, bright yellow-green spot is visible on the left side of the image, indicating a region of high metabolic activity or tracer concentration. A vertical white line runs through the center of the brain, representing the midline. The overall shape of the brain is roughly oval, with some internal structures visible as lighter blue areas.
