

ABA: 69169355

CA1

This is a fluorescence microscopy image of a brain section. The image is divided into four quadrants by a vertical and a horizontal white line. The left half of the image shows a bright blue, textured area, likely representing the CA1 region of the hippocampus. The right half is mostly black, indicating a lack of signal or a different tissue type. The text 'ABA: 69169355' is in the top left, and 'CA1' is in the bottom left.
