IC

A blue brain scan image, likely a PET or SPECT scan, showing a coronal cross-section of a human brain. The image is centered on a black background. A white crosshair is overlaid on the image, with a vertical line and a horizontal line intersecting at the center. The brain tissue is represented by a bright blue color, with some darker blue areas indicating lower intensity. The overall shape of the brain is roughly oval, with some internal structures visible as darker blue regions.
