

ABA: 69671863

ME

This is a PET scan image of a brain, likely a coronal section. The image shows a focal area of increased activity (yellow/red) in the left hemisphere, which is consistent with the ABA value of 69671863. The rest of the brain shows low activity (blue). The image is divided into four quadrants by a vertical and a horizontal line. The label 'ME' is in the bottom left corner.
