

ABA: 69818036

Cb lobe

The image displays a brain scan, likely an axial slice, with a specific region highlighted in blue. This blue region is located in the posterior part of the brain, corresponding to the cerebellum. The highlighted area is roughly U-shaped, with a central vertical indentation. There are three distinct, brighter spots within the blue region, suggesting areas of higher intensity or activity. A white grid is superimposed on the image, with a horizontal line passing through the middle of the brain slice and two vertical lines. The text 'ABA: 69818036' is positioned in the top-left corner, and 'Cb lobe' is in the bottom-left corner.
