

ABA:70194582

SPa dorsal

The image displays a fluorescence microscopy scan of a SPa dorsal structure. The field of view is a circular area with a dark background. A bright, localized blue spot is visible in the upper left quadrant, indicating a specific point of interest or a high-intensity signal. The rest of the circular area is dark, with some faint, diffuse blue light. A white crosshair is overlaid on the image, dividing it into four quadrants. The text 'ABA:70194582' is in the top left, and 'SPa dorsal' is in the bottom left.
