

ABA:70194636

VMH

This fluorescence microscopy image displays a coronal section of a brain. The image is divided into two main regions by a vertical white line. The left region, labeled 'ABA:70194636' at the top and 'VMH' at the bottom, shows a dense cluster of bright blue fluorescent spots, indicating a high concentration of the fluorescent marker. The right region shows a more uniform, solid blue color, suggesting a lower concentration or a different distribution of the marker. A horizontal white line intersects the vertical one, creating a crosshair that serves as a reference point for the location of the fluorescent signal.
