

ABA:70203417

Pa

This is an astronomical image of a galaxy, likely a spiral galaxy, showing a color map of intensity. The image is divided into four quadrants by a white crosshair. The left half of the image shows a complex, filamentary structure with bright yellow and orange regions, indicating high intensity or specific emission. The right half is predominantly blue, indicating lower intensity or a different spectral component. The text 'ABA:70203417' is in the top left, and 'Pa' is in the bottom left.
