

ABA:70300162

SCN

This image is a fluorescence micrograph of a brain section, likely from a mouse, showing the Suprachiasmatic Nucleus (SCN). The image is divided into four quadrants by a vertical and a horizontal white line. The left half of the image shows a dense population of neurons, with several bright blue spots indicating specific cells or regions of interest. The right half of the image is mostly dark, suggesting a lack of signal or a different experimental condition. The text 'ABA:70300162' is in the top left, and 'SCN' is in the bottom left.
