

ABA:70305634

DG

This is a fluorescence microscopy image of a brain section. The image is divided into four quadrants by a white crosshair. The left half of the image shows a complex, bright blue and green pattern, likely representing a specific brain region. The right half is mostly dark blue. A bright, localized spot of yellow-green fluorescence is visible in the center of the left half, near the crosshair. The text 'ABA:70305634' is in the top left, and 'DG' is in the bottom left.
