

ABA:70429202

CA1

This is a fluorescence microscopy image of a brain section. The image is divided into four quadrants by a white crosshair. The left half of the image shows a complex, irregularly shaped region with a blue background and several bright spots of yellow and orange, indicating high fluorescence intensity. The right half of the image is a solid, uniform blue rectangle. The text 'ABA:70429202' is located in the top left corner, and 'CA1' is located in the bottom left corner.
