

ABA:70527951

ME

This is a coronal PET scan of a human brain. The image shows a cross-section of the brain with a color scale indicating metabolic activity. A focal area of increased activity, shown in yellow and red, is visible in the left hemisphere, likely representing a tumor or other pathological process. The rest of the brain shows low-level activity, represented by blue. A vertical line is drawn through the center of the brain, and a horizontal line is drawn across the bottom. The text 'ABA:70527951' is in the top left, and 'ME' is in the bottom left.
