

ABA:70598369

Arc

This is an astronomical image, likely a radio continuum map, showing a galaxy. The image is divided into four quadrants by a vertical and a horizontal white line. The left half of the image shows a complex, irregular structure with several bright spots, indicating high intensity. The right half is mostly dark blue, suggesting low intensity. Two specific regions are highlighted with yellow and red colors, indicating the highest intensity. One is located in the upper left quadrant, and the other is in the lower left quadrant, near the intersection of the white lines. The text 'ABA:70598369' is in the top left, and 'Arc' is in the bottom left.
