VMH

This is a fluorescence microscopy image of a brain section, likely from a rodent, showing the ventral medial hypothalamus (VMH). The image is divided into four quadrants by a vertical and a horizontal white line. The left half of the image shows a blue-stained brain section. The right half is black. There are two bright spots of fluorescence: one in the upper right quadrant (top-right) and one in the lower right quadrant (bottom-right). The text 'ABA:70598370' is in the top left, and 'VMH' is in the bottom left.
