

ABA:70784860

OB anterior

This image is a fluorescence micrograph of a brain section. It features two distinct clusters of signal, primarily in shades of blue and cyan, set against a black background. The cluster on the left is more complex and brighter, with several small, intense cyan spots. The cluster on the right is more uniform and less bright. A white crosshair is centered on the image, with a vertical line passing through the space between the two clusters and a horizontal line passing through the middle of the clusters. The text 'ABA:70784860' is in the top left, and 'OB anterior' is in the bottom left.
