

ABA: 70814342

SN

This is an axial PET scan of a human brain. The image shows a cross-section of the brain with a color scale from blue (low activity) to red (high activity). A prominent, focal area of increased radiotracer uptake is visible in the left temporal region, indicated by a red and yellow spot. The rest of the brain shows relatively low activity, represented by blue and green colors. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the level of the scan. The text 'ABA: 70814342' is in the top left corner, and 'SN' is in the bottom left corner.
