

ABA:71016721

SPa dorsal

The image displays two side-by-side brain scans, likely from a PET or SPECT study, showing the dorsal view of a brain. The scans are color-coded, with blue representing lower activity and yellow/green representing higher activity. A prominent ring of high activity is visible around the periphery of the brain in both scans. The left scan shows slightly more intense activity in the upper-left quadrant. A vertical white line separates the two scans, and a horizontal white line is positioned below the scans. The text 'ABA:71016721' is in the top left, and 'SPa dorsal' is in the bottom left.
