

ABA:71307202

VMH

A coronal section of a rodent brain is shown against a black background. A large, symmetrical region in the medial part of the brain is highlighted in a solid blue color. This region is roughly butterfly-shaped, with two large lobes on either side of the midline and a narrower section in the center. The blue area is labeled 'VMH' in the bottom left corner. The text 'ABA:71307202' is located in the top left corner. A thin white vertical line runs down the center of the image, and a thin white horizontal line runs across the middle, intersecting at the center of the brain section.
