

ABA:71763753

VMH

This fluorescence microscopy image displays a coronal section of a brain. The image is divided into two main regions by a vertical white line. The left region shows a complex pattern of blue and yellow fluorescence, indicating the presence of specific markers. The right region is predominantly blue, suggesting a different level of fluorescence or a control area. A horizontal white line intersects the vertical one, creating a crosshair. The text 'ABA:71763753' is located in the top left corner, and 'VMH' is in the bottom left corner.
