

ABA: 72079884

IC

This is a fluorescence microscopy image of a brain section. The image shows a symmetrical pattern of blue and yellow-green fluorescence against a black background. The most intense fluorescence (yellow-green) is located in two distinct, bright spots in the upper central region, likely representing the hippocampus. The surrounding areas show a more diffuse, lower-intensity blue fluorescence. A white crosshair is overlaid on the image, with a vertical line passing through the center of the two bright spots and a horizontal line passing through the middle of the image. The text 'ABA: 72079884' is in the top left corner, and 'IC' is in the bottom left corner.
