

ABA:72340134

VMH

This image is a coronal brain scan, likely a PET or SPECT scan, showing a cross-section of the brain. The image is divided into four quadrants by a vertical and a horizontal white line. The top-left quadrant is labeled 'ABA:72340134' and the bottom-left quadrant is labeled 'VMH'. The brain tissue is represented by a blue color scale, with yellow and red indicating areas of higher activity or concentration. There are several distinct areas of high activity: a small, elongated yellow/red spot in the upper-middle region; a larger, more complex yellow/red area in the lower-right region; and a smaller, elongated yellow/red spot in the lower-left region. The background is a uniform blue color.
