CPu medial

A coronal slice of a human brain showing functional activation in the medial region of the Caudate Putamen (CPu). The activation is represented by a blue color scale, with the most intense areas appearing as bright blue. The brain is divided into four quadrants by a vertical and a horizontal white line. The activation is primarily located in the left hemisphere (viewer's right) and extends into the right hemisphere (viewer's left). The text 'ABA: 73513392' is in the top left, and 'CPu medial' is in the bottom left.
