

ABA: 73521810

LH

This is a coronal PET scan of a human brain. The image shows a cross-section of the brain with a central hypermetabolic lesion in the left hemisphere, indicated by a bright yellow-green spot. The surrounding brain tissue shows a blue-to-yellow color gradient, representing varying levels of metabolic activity. A white crosshair is overlaid on the image, with the vertical line passing through the center of the lesion. The text 'ABA: 73521810' is in the top left, and 'LH' is in the bottom left.
