

ABA:73616033

Pn

The image displays a cross-sectional view of a brain, likely from a PET or SPECT scan. The brain's structure is visible as a dark blue silhouette against a black background. A prominent, localized area of high metabolic activity is shown in the lower central region, characterized by a color gradient from yellow to red. This area is centered on the vertical midline and is partially intersected by a horizontal white line. A vertical white line also passes through the center of the image, creating a crosshair that divides the brain into four quadrants. The text 'ABA:73616033' is located in the top left corner, and 'Pn' is in the bottom left corner.
