

ABA: 74047905

LH

This is an axial PET scan of a human brain. The image shows a cross-section of the brain with a color scale from blue (low uptake) to red (high uptake). A prominent, well-defined area of increased uptake is visible in the left hemisphere, located in the posterior region, likely involving the occipital lobe. The rest of the brain shows relatively uniform, low-level uptake. A vertical line and a horizontal line intersect at the center of the brain, dividing it into four quadrants. The label 'ABA: 74047905' is in the top left, and 'LH' is in the bottom left.
