

ABA:74431564

CA1

This image is a fluorescence micrograph of a brain section, likely from a rodent, showing a localized signal in the CA1 region. The signal is represented by a bright blue/cyan area, indicating a specific fluorescent marker or protein expression. The brain section is divided into four quadrants by a vertical and a horizontal line. The signal is located in the upper-left quadrant, which corresponds to the CA1 region of the hippocampus. The text 'ABA:74431564' is visible in the top-left corner, and 'CA1' is visible in the bottom-left corner.
