

ABA:74514186

CA1

This is a fluorescence microscopy image of a brain section, likely from a rodent. The image shows a coronal slice with a central vertical structure, possibly the corpus callosum, and two large, dark, irregularly shaped regions on either side, which are the cerebral hemispheres. The entire image is overlaid with a grid of white lines. The text 'ABA:74514186' is in the top left corner, and 'CA1' is in the bottom left corner. The image is predominantly black, with some faint, blurry, light-colored spots visible in the left hemisphere, suggesting the presence of a fluorescent signal.
