

ABA:74562284

LH

A coronal brain scan image, likely from a PET or SPECT study, showing a cross-section of the brain. The image is predominantly black, with a large, irregularly shaped blue region in the center, representing areas of increased metabolic activity or perfusion. The blue region is roughly symmetrical but shows some asymmetry, with a slightly brighter area on the left side (viewer's right). A white crosshair is overlaid on the image, with a vertical line passing through the center and a horizontal line passing through the lower part of the brain. The text 'ABA:74562284' is located in the top left corner, and 'LH' is in the bottom left corner.
