

ABA: 74735277

CA1

This is a fluorescence microscopy image of a brain section. The image is divided into four quadrants by a white crosshair. The left half of the image shows a bright, irregularly shaped region, likely representing the CA1 area of the hippocampus. This region is predominantly blue, with some yellow and red areas indicating higher intensity or specific staining. The right half of the image is mostly dark blue, suggesting a different tissue type or a different staining pattern. The text 'ABA: 74735277' is in the top left corner, and 'CA1' is in the bottom left corner.
