

ABA: 74990535

Tg

This image is a fluorescence micrograph of a plant tissue section. A central, bright blue-green spot indicates a high concentration of a fluorescent marker. This spot is surrounded by a larger, dimmer blue area, suggesting a more diffuse distribution of the marker. The image is divided into four quadrants by a white crosshair, with the label 'ABA: 74990535' in the top-left and 'Tg' in the bottom-left.
