

ABA:75988413

VMH

The image shows a coronal section of a brain. A large, irregularly shaped region in the center is filled with a solid blue color. This region is roughly symmetrical about the midline. A small, bright blue spot is located at the very center of the brain, just below the midline. The background is black. Two thin white lines intersect at the center of the brain, forming a crosshair. The text 'ABA:75988413' is in the top left corner, and 'VMH' is in the bottom left corner.
