

ABA: 76085745

VMH

This image is a coronal brain scan, likely a PET or SPECT scan, showing a cross-section of the brain. The image is predominantly blue, with a central vertical line indicating the midline. There are several bright yellow and orange spots, indicating areas of high metabolic activity or tracer uptake. One prominent spot is located in the central region, just above the brainstem. Other smaller spots are visible in the lateral regions of the brain. The text 'ABA: 76085745' is in the top left, and 'VMH' is in the bottom left.
