

ABA:76098404

SCN

The image shows a coronal section of a brain, likely from a rodent, with a blue fluorescent signal. The signal is concentrated in the subchiasmatic nucleus (SCN), which is located in the ventral part of the hypothalamus. The signal appears as a bright blue spot in the lower-left quadrant of the image. The rest of the brain tissue is dark, indicating low background fluorescence. A vertical line and a horizontal line intersect at the center of the brain, dividing it into four quadrants. The text 'ABA:76098404' is in the top-left corner, and 'SCN' is in the bottom-left corner.
