

ABA:77620766

VMH

This is a fluorescence microscopy image of a brain section. The image shows a coronal slice of the brain with a central vertical line indicating the midline. The left side of the image (patient's right) shows a bright, irregularly shaped region of fluorescence, likely representing the ventral medial hypothalamus (VMH). The right side of the image (patient's left) shows a more uniform, less fluorescent region. A horizontal line is drawn across the middle of the image, intersecting the vertical midline. The text 'ABA:77620766' is in the top left corner, and 'VMH' is in the bottom left corner.
