

ABA:77800915

SCN

This image is a fluorescence micrograph of a brain section. It is divided into four quadrants by a vertical and a horizontal white line. The top-left quadrant contains a bright blue, irregularly shaped fluorescent region. The top-right quadrant contains a solid, uniform blue rectangular region. The bottom-left and bottom-right quadrants are dark and appear to be empty. The text 'ABA:77800915' is located in the top-left corner, and 'SCN' is located in the bottom-left corner.
