

ABA:79490112

LH

This is an axial PET scan of a human brain. The image displays metabolic activity using a color scale where blue represents low activity and yellow/red represents high activity. The scan shows a cross-section of the brain with a prominent area of high activity (yellow/red) in the left hemisphere, specifically in the frontal and parietal regions. The right hemisphere shows lower activity (blue). A vertical line is drawn through the center of the brain, and a horizontal line is drawn across the middle. The text 'ABA:79490112' is in the top left, and 'LH' is in the bottom left.
