

ABA: 79912613

VA/VL

This is an axial PET scan of the brain. The image shows a cross-section of the brain with a color scale from blue (low activity) to yellow (high activity). Two distinct areas of high activity are visible in the anterior cingulate cortex, one on each side of the midline. The rest of the brain shows relatively low activity. A white crosshair is overlaid on the image, with the vertical line passing through the midline and the horizontal line passing through the level of the anterior cingulate cortex. The text 'ABA: 79912613' is in the top left corner, and 'VA/VL' is in the bottom left corner.
